

Full site editing blocks -Reference

Updated 2020-06-04, Gutenberg version 8.2 or later.

All of these blocks requires Full site editing to be enabled.

Post blocks:

<https://github.com/WordPress/gutenberg/issues/15623>

Please see this issue for planned changes:

<https://github.com/WordPress/gutenberg/issues/21087>

Post blocks:

Post title

```
<!-- wp:post-title /-->
```

Output:

```
<h1>Hello world!</h1>
```

Issues and pull requests

<https://github.com/WordPress/gutenberg/labels/%5BBlock%5D%20Post%20Title>

Post author

The Post author block lets you change the post author, and presents the author information.

There are options to display a byline, gravatar, and author description. *The description cannot be edited.*

```
<!-- wp:post-author /-->
```

Output:

```
<div class="wp-block-post-author">  
<div class="wp-block-post-author__content">  
<p class="wp-block-post-author__name">author name</p>  
</div></div>
```

Issues and pull requests

<https://github.com/WordPress/gutenberg/issues?q=is%3Aclosed+label%3A%22%5BBlock%5D+Post+Author%22>
<https://github.com/WordPress/gutenberg/issues/19696>

Post date

The post date blocks lets you schedule posts, and select the date format for the output of the date.

```
<!-- wp:post-date /-->
```

Output:

```
<time datetime="2020-05-28T10:29:20+00:00">May 28,  
2020</time>
```

Issues and pull requests

<https://github.com/WordPress/gutenberg/issues/19697>

Post excerpt

The Post excerpt block includes options to add a read more link below the excerpt and change the link text.

You can choose whether to display the link on the same line as the content, or below it.

You can also choose the length of the excerpt.

```
<!-- wp:post-excerpt /-->
```

Output:

```
<p>excerpt</p>
```

Optional Read More link to the post:

```
<p><a href="(post link)">Link text</a></p>
```

Issues and pull requests

<https://github.com/WordPress/gutenberg/issues/19698>

Post tags

In its first basic version, the block displays the post tags.

In the ticket listed below you can read about the planned features.

```
<!-- wp:post-tags /-->
```

Output:

```
<a href="http://example.com/?tag=sample">sample</a> |  
<a href="http://example.com/?tag=test">test</a></div>
```

Issues and pull requests

<https://github.com/WordPress/gutenberg/pull/20418>

<https://github.com/WordPress/gutenberg/pull/19580>

Post featured image

```
<!-- wp:post-featured-image /-->
```

Output

(Example sizes. Note that the wrapping p tag is part of the default output.)

```
<p>
```

Issues and pull requests

<https://github.com/WordPress/gutenberg/labels/%5BBlock%5D%20Post%20Featured%20Image>

Post content

```
<!-- wp:post-content /-->
```

Output:

```
<div class="entry-content">  
<p>Welcome to WordPress. This is your first post. Edit or  
delete it, then start writing!</p>  
</div>
```

Issues and pull requests

<https://github.com/WordPress/gutenberg/issues/22080>

<https://github.com/WordPress/gutenberg/pull/22473>

<https://github.com/WordPress/gutenberg/pull/18461>

Comment blocks:

Post comments count

```
<!-- wp:post-comments-count /-->
```

Output:

```
<span class="wp-block-post-comments-count">1</span>
```

Post comments

Uses the `comments_template()` on the front, refer to

https://developer.wordpress.org/reference/functions/comments_template/

There are plans to create separate blocks for these different element, like the comment area heading, comment navigation, etc.

```
<!-- wp:post-comments /-->
```

Issues and pull requests

<https://github.com/WordPress/gutenberg/labels/%5BBlock%5D%20Post%20Comments>

Post comments form

Uses `comment_form()` on the front, refer to

https://developer.wordpress.org/reference/functions/comment_form/

```
<!-- wp:post-comments-form /-->
```

Other blocks

Site Title

```
<!-- wp:site-title /-->
```

Output:

```
<h1>Theme Preview</h1>
```

Issues and pull requests

<https://github.com/WordPress/gutenberg/issues/19491>

<https://github.com/WordPress/gutenberg/pull/17207>

Query, Loop, and query pagination

```
<!-- wp:query {"queryId":0} -->
```

```
<!-- wp:query-loop --><!-- /wp:query-loop -->
```

```
<!-- wp:query-pagination /-->
```

```
<!-- /wp:query -->
```

Example with content inside the loop:

```
<!-- wp:query
{"queryId":0,"query":{"per_page":4,"pages":5,"offset":0}} -->
<!-- wp:query-loop →
    <!-- wp:post-title /-->
    <!-- wp:post-content /-->
<!-- /wp:query-loop -->

<!-- wp:query-pagination /-->
<!-- /wp:query →
```
